

SCCAP 2, Climate Change Adaptation Programme

The SSN Secretariat has added points and questions against each of the SCCAP 2 consultation questions to help you develop and consider your organisation's response. Our points and sub questions are shown in blue and are intended as a helpful prompt and are not intended to unduly influence your own individual feedback.

Q1. Do you agree with our outcome-based approach to adaptation in Scotland?

- *Consider the advantages and disadvantages of an outcomes based approach*

Q2. Do you agree that a National Forum on Adaptation should be established to facilitate discussion on climate change adaptation?

In developing your response you may wish to consider:

- *The purpose of the Forum*
- *The influence and role of the Forum*
- *Who should / could represent your sector/ organisation on the Forum*

Q3. Do you agree that climate change adaptation behaviours should be included in the Programme?

In developing your response you may wish to consider:

- *Advantages and disadvantages of including adaptation behaviours*
- *Whether the adaptation behaviours included in the draft programme are appropriate*
- *If and how adaptation behaviours could be included more effectively*

Q4. Do you agree that an integrated approach should be taken to monitoring and evaluation?

Consider:

- *How will your organisation benefit from the proposed approach to monitoring and evaluation?*
- *Could the proposed approach to monitoring and evaluation be improved?*

Q5. Do you agree with our long term vision for adapting to climate change in Scotland?

- *What are the strengths and weaknesses of the vision?*
- *How could the vision be improved?*

Q6. Does the Programme identify the right outcomes for Scotland over the next five years?

- *Are there any outcomes missing?*
- *Could any of the outcomes be strengthened?*

Q7. Are there any additional policies that should be included in the outcomes set out in the following pages?

Consider each outcome and the associated policies and proposals:

- *Will the policies and proposals that have been included for each outcome result in measurable progress towards achieving the outcome?*
- *How could the policies and proposals be strengthened? Consider measurability and contribution towards achieving the specified outcome.*
- *Are additional policies and proposals required? What are the gaps? How could they be filled?*
